

# Environmental Policy

At EMC, we recognise the impact that our operations can have on the environment. We believe in a sustainable future and understand our responsibility to contribute positively. This Environmental Policy is an embodiment of our intentions, responsibilities, and actions regarding environmental sustainability.

## Our Commitment

We commit to continual improvement in our environmental performance and the reduction of our carbon footprint.

We strive to incorporate environmental considerations into all our business decisions.

Our objective is to meet, and where feasible, exceed the minimum regulatory environmental standards set by the UK Government and other relevant bodies.

## Key Areas of Focus

**Energy Efficiency:** We are dedicated to enhancing energy efficiency across all our operations, facilities, and services. Regular audits and reviews will be conducted to identify opportunities for improvement.

**Waste Management:** Emphasising the principles of reduce, reuse, and recycle, we will work towards minimising waste from our operations and promote recycling and the use of recycled materials.

**Sustainable Sourcing:** Where possible, we will source materials and services from suppliers who share our commitment to the environment, giving preference to those who operate in an environmentally friendly manner.

**Emission Reduction:** We are committed to identifying and implementing practices that reduce emissions from our operations, transportation, and other relevant areas.

**Employee Engagement:** Every member of the EMC family plays a vital role in our environmental efforts. We will provide regular training and resources to keep our team informed and proactive.

## Monitoring & Review

Our environmental objectives and targets will be regularly reviewed and updated to ensure relevance and effectiveness.

We will conduct periodic environmental audits to monitor our compliance with this policy and relevant legislation.

## Communication

This policy will be communicated to all employees and will be made available to our clients, stakeholders, and the public on our official website and other relevant platforms.

By embracing these principles and objectives, EMC aims not only to meet our environmental obligations but to be an industry leader in environmental responsibility.
